## # 2222 D/S POLYESTER TAPE

It is transparent double sided adhesive tapes consist of transparent polyester film with modified acrylic adhesive system. It has an easy release paper liner. The tape is very thin and offers a good tack and high shear resistance hence ideal for splicing application. Red color is also available on demand.

**Applications :** Mounting of badges and signs made of metal or plastic, splicing of thin plastic or metal films, used for core starting application bin film manufacturing & processing units, for manual splicing of films like polyester or BOPP at reealer & rewinding station of film manufacturing and processing units.

## # 2223 D/S TISSUE TAPE

It is a double sided mounting tape equipped with a light weight tissue paper backing and coated with an acrylic adhesive of very high tack and resistant to light and aging. This tape is used in shoe and leather industry, foam industry, postal service, decoration, label and lot of other uses. Both hotmelt and Solvent Tissue tapes available.

**Applications :** Lamination of nameplates and logos, fixing of front fascia plate, mounting of plastic door linings in the car industry, fixing of garment labels.

## # 2224 D/S CLOTH TAPE

This tape is made out of cloth and is coated on both sides with strong natural rubber adhesive which also has masking properties. This tape is laminated with polyester or paper release liner.

**Application :** Mounting of rubber plates, mounting of photo- polymeric plates, fixing of uneven surfaces such as felt and carpets mounting stereos and joining dissimilar materials etc.

## # 2225 D/S FOAM TAPE

This tape is made out of foam of PE, PU, PVC and EVA coated with various types of adhesive for various applications. It is used in refrigeration, stationery, die-cut, impact preventing material or adheres with advertising sign board and plates and various other applications. This tape is available in different thicknesses.

**Applications :** It is used in refrigeration, stationery, die-cut, impact preventing material or adheres with advertising sign board and plates and various other applications. This tape is available in different thicknesses.

## # 2226 FLOOR MARKING TAPE

It is a plasticized PVC tape coated with an aggressive modified rubber-resin adhesive, which is lead free, good adhesion to most surfaces, distinct colors code for safety warning and marking, remove without adhesive residue. It also has good resistance to solvent, oil and water. Available in Multi Colours : Red, White, Yellow, Blue, Green, Zebra (Yellow/Black).

**Applications :** It is suitable for line marking to delineate lanes & opening, hazard warning to identify potential risk area & safety zone.

## # 2227 ALUMINIUM FOIL TAPE

It is a specialty tape designed for mounting of refrigeration coils and other similar applications. It is a dead-soft aluminium foil tape coated with a modified acrylic adhesive system and with an easy-release paper liner. It is highly conformable resulting in easy application over the refrigeration coils without rupturing. The adhesive system is stable over wide temperature range, making it ideal for application in refrigerator, coolers, etc. It acts as an excellent barrier to moisture and prevents damage to the coils from PUF. Available in Multi Colours : Red, White, Yellow, Blue, Green, Zebra (Yellow/Black).

**Applications :** Holding of condenser / evaporator coils in refrigerators, moisture barrier eg. around windows in luxury buses & in appliances, general purpose heat reflector, mechanical holding of wires in appliances walls etc.

## # 2228 DUCT TAPE

It is a polyethylene laminated mesh cloth adhesive tape with high flexibility and conform ability. This tape is suitable for duct work and general purpose. It is widely used in Aerospace, Automotive, Electrical, Heating Ventilation and Air conditioning (HVAC) and Construction industries. It has good adhesion even on rough surfaces, waterproof and easy to tear by hand.

**Applications :** Sealing of ducts, fastening of protection films, closing of covering foils, especially in the field of asbestos removal, sealing of rubbish bags, fixing, closing, packaging and a lot more etc.

## # 2229 FILAMENT TAPE (MONO & CROSS)

This tape has fiberglass reinforced backing, very high tensile strength and not easy to break. It can be used against steel straps for heavy duty packing and mounting of articles in white good industry. Mono filament tape is also used as holding tape in refrigerators because it is residue free and so while removing the tape, the adhesive will not get transferred.

**Applications :** Bundling and strapping heavy goods, securing pallets, closing and reinforcing of shipping cartons.

## # 2231 BLUE DOOR HOLDING TAPE

It is a medium duty strapping / securing tape. It is specially designed tape with a unique natural rubber adhesive system, which is stain and adhesive transfer resistant, clean removal from the plastic surface even after a long period of storage.

**Applications :** Closing, holding and securing in the appliance / furniture industry / packaging. It is used during manufacturing of appliances (in process) and during transportation for securing against damage.

## # 2222 D/S RED POLYESTER TAPE (FILMIC LINER)

Red Polyester Tape (Filmic liner) is a double sided adhesive strip with translucent Salmon Red Color PE Liner which is highly suitable for mounting of decorative profiles, moldings, and trim parts for wide width lamination. Our red tapes are manufactured from finest-grade polyester that acts as a jacket of protection to withstand great heat exposure.

**Application :** It is recommended for film splicing/joining application. Preferred for flex Media joint foam board fixing, Glass and acrylic transparent sheet joining.

## # 2232 MASKING TAPE (GP)

A premium and economical general purpose grade Crepe Paper Masking Tape provides excellent pressure-sensitive and quick qualities which are highly resistant to water solvent and oils. Our high-grade masking tape is used for painting on paper, drawing, on the wall, and several other personal and professional purposes.

**Application :** They are used in paint shop refrigeration, automotive & business machinery and many other places for general purpose application. They are recommended for a wide variety of packing & light bundling operations.

## # 2234 SURFACE PROTECTION TAPE

Surface protection Tapes are plastic flexible films with self-adhesive and self-adhering properties. Surface Protection Films designed to prevent the surface from scratches, marks during handling, transit, and after installation etc. These surface protection tapes give excellent scratch resistance and masking properties.

**Application :** The major industries in which it is preferred are Signage, Automotive, Label and Construction Industries. Other various common places of application are Color Coated Steel Sheets, Decorative Laminates, Anodized/Powder Coated Aluminum Sections, Marble / Granite, Aluminum Sheets, UPVC Profiles, Stainless Steel Sheets and Wooden Flooring etc.

## # 2225 S/S FOAM TAPE (EVA)

Single-sided foam tape is a strong adhesive strip which provides a cushion against vibration and shock. It can be easily compressed and conformed. Very high bonding grade, reliable bonding performance.

### Application :

- Good flexibility for structural surfaces.
- Good filling property, suitable for effective filling of gaps in visible parts.
- Good cushioning, UV resistance and aging resistance.

## # 2239 ACRYLIC FOAM TAPE (VHB TAPE)

Provides the convenience and simplicity of a tape fastener and are ideal for use in many interior and exterior bonding applications. In many situations, they can replace rivets, spot welds, liquid adhesives and other permanent fasteners. These tapes are made with acrylic foam which is viscoelastic in nature. This gives the foam energy absorbing and stress relaxing properties which provides this tape with their unique characteristics. The acrylic chemistry provides outstanding durability performance.

**Application :** Our Acrylic double sided tape is used for fixing of GI Panels, MS Sheets & Body Building Industries Acrylic adhesive tape is employed for mounted trims, emblems & body side moldings are fixed Acrylic foam tape is recommended to bond many similar or dissimilar substrates

## # 2240 KRAFT PAPER TAPE

kraft paper coated with natural rubber adhesive that exhibits high adhesion and good shear properties. This double structured backing increases the tapes mechanical strength while siliconizing reinforces its resistance to moisture and water. It is 100% biodegradable.

**Application :** Sealing carton and general packing purpose. Suitable for cold storage or humidity conditions packing. Non-repulpable splicing, core starting and end tabbing. Towing electrical and mechanical parts for conversion. Used in silk screening & picture framing.

## # 2320 BOPP TAPE

Bioaxially oriented polypropylene (BOPP) film coated with acrylic based adhesive in different micron (gsm) coating thickness. The BOPP tape is available in different colours. BOPP tape is used in carton box sealing and for stationery purpose. Printing of single and multiple colour is also possible with logo or customized design. Company name, logo, contact details and customized messages can be printed on tape to communication quality & professionalism.

## # 2235 PVC INSULATION TAPE

PVC Insulating Tape is produced from soft PVC film primarily for electrical insulation purposes. It is also used for binding of electrical tools, manufacturing of automobile harness, anti-magnetic coil and various other purposes. It is also used for binding of electrical tools, manufacturing of automobile harness, anti-magnetic coil and various other purpose. Available in Red, Yellow, Blue, Black, Green colours in standard length of 10 mtrs & 20 mtrs.

**Application :** Electrical insulation, cable harnessing industries in relation to automotive segment.

## #2320 ADVERTISING TAPES

Bioaxially oriented polypropylene (BOPP) film coated with acrylic based adhesive in different micron (gsm) coating thickness. The BOPP tape is available in different colours. BOPP tape is used in carton box sealing and for stationery purpose. Printing of single and multiple colour is also possible with logo or customized design. Company name, logo, contact details and customized messages can be printed on tape to communication quality & professionalism.

## SF-555 SILICON SELF FUSING HT TAPE

Silicon Self-Fusing Tape (High Temperature Self-Fusing Insulation Tape): Silicone Rubber Self-Fusing Tape is a high performance, extruded wrapping tape. No adhesive is required. SSF Tape is self-adhering, self-fusing and permanent. It fuses in minutes and cures in 24 hours at room temperature. Faster curing and a harder finish is accomplished by applying heat after wrapping. Temperature range is 60°C to 250°C for continuous use; -65C to +260C for intermittent use. Break down voltages 33.6KV. Silicone Self-Fusing Tape is tough, permanently resilient, insulating and void-free. This product is amazingly useful. Size: 1ROLL 25.4MM X 0.508MM X 12 YARDS

**Application:** Automatic wrapping, electrical insulation, moisture protection, high or low temperature applications. SSF is thermally conductive which allows generated heat to dissipate rapidly. Used in Military, aerospace, industrial motor and marine applications including utility cable terminations and splices, bus bar insulation, motor coil terminal connections, and fuel line and hose repair.

## SF-556 TAPE (SELF AMALGAMATING INSULATING TAPE)

Self amalgamating insulating tape is specially prepared for electrical & electronic industries, Panel makers, Projects, Electrical contactors, electrical utilities etc. Excellent electrical properties such as superior volume resistivity, higher breakdown voltage. Excellent resistance to polluted atmosphere, saline water and weather. This product is amazingly useful. Break down voltages 53 KV. SIZE: 1ROLL 38MM X 0.76MM X 9.1 mtrs.

**Application:** Clean & degrease the surface thoroughly by using any solvent residueless cleaner. The tape contains plastic liner Stretch 25-30% & wrap with moderate tension with half overlap. Apply last lap with zero stretch. Press down to avoid end lifting before fusion takes place. The tape will start amalgamating within 1-2 hours and full amalgamating within 24 hours.
